Applicant(s)

WEINER, MICHAEL L.

Examiner

Scott M. Getzow

Art Unit

3762

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. Claims 32-38,41-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine et al (6,058,328) in view of Collins (5,782,873).

See previous office action.

2. Claims 39,40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine et al (6,058,328) in view of Collins (5,782,873) and further in view of Klemic et al (2004/0168912).

See previous office action.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The remarks made by applicant have been considered, however the above rejections are still deemed to be proper. Applicant's principal argument is that Collins appears not to teach generating an electrical enhancement signal based upon a sensed condition of the patient. However, it is considered to be common sense that an electrical enhancement signal be generated based upon a sensed signal since the user would want to know when the particular tissue is not functioning properly so that the tissue can have its threshold lowered so that it can function normally. Further, to generate an enhancement signal without first meeting certain conditions, (such as detecting that the tissue is not functioning properly), would be a waste of energy for the battery, and therefore an inefficient use of the system. The ordinarily skilled artisan would want to use the bio-function device in the most efficient manner, which would be only generating a signal when needed. It should also be noted that Collins teaches that adjustment of the 'bias' signal can be done in response to a particular signal received from a transducer intermittently after the device is installed in the patient, col. 7.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.
